</> PROFESSIONAL SUMMARY

Frontend Engineer with **4+ years of experience** building scalable, high-performance web applications using **React.js, Next.js, TypeScript, and modern frontend tooling**. Experienced in developing fintech platforms, internal dashboards, and customer onboarding systems that support real-world business operations. Skilled at translating UI/UX designs into responsive, production-ready interfaces with a strong focus on performance optimization, accessibility, and user experience. Passionate about building maintainable frontend architecture and delivering intuitive digital experiences.

🛠️ PROFESSIONAL EXPERIENCE

07/2025 – Present Lagos, Nigeria	Sapphire Virtual Network Limited  Frontend Engineer - Led frontend development of a Recovery Portal used by field collections agents to log visitations, submit structured reports, and track recovery activities for defaulting customers. - Built role-based dashboards and secure interfaces as part of the company's 3.0 unified platform, improving operational visibility across multiple business units. - Developed agent-facing workflows for the Device Financing module, including customer onboarding, KYC verification, and device purchase processing. - Improved usability and workflow efficiency by redesigning key user journeys previously implemented in the Version 2.0 platform.
Ontario, Canada	ShotByPortable  Frontend Engineer - Built a responsive photography portfolio platform using modern frontend technologies. - Translated UI designs into a seamless user experience optimized for both desktop and mobile devices. - Developed a custom admin dashboard allowing the client to manage galleries, pricing packages, and bookings. - Improved navigation, usability, and brand presentation across the entire website.
Ibadan, Nigeria	Siryoung Technologies  Frontend Developer - Developed and deployed the company's platform using Next.js, TypeScript, and Tailwind CSS. - Translated Figma UI designs into pixel-perfect, reusable UI components. - Implemented SEO optimization and Open Graph metadata to improve social sharing previews and search visibility. - Optimized performance and responsiveness to ensure fast loading times across devices.
Alberta, Canada	AyoCPA  Frontend Developer - Developed a professional website for a Canadian accounting firm to strengthen its online presence. - Collaborated with UX designers to translate UI concepts into functional frontend components. - Built a Client Portal interface allowing users to access tax filing services and financial resources online.

- Ensured consistent design and usability across multiple screen sizes.
